Last Update: (06/05/03) RShibata:kma - 2.9.P.0

This is a new policy covering requirements for Quality-Significant procurements.

Background - 2.9.P.1

This policy was implemented to comply with laboratory requirements that a uniform system be developed to ensure that Quality-Significant requirements are applied to the procurement of goods and services. However, while the Procurement Center has the primary responsibility for the procurement of goods and services at SNL, the line requester is ultimately responsible for the identification of Quality-Significant procurements.

Policy - 2.9.P.2

It is SNL's policy to ensure that it is fully compliant with all applicable federal laws as related to the Price-Anderson Amendments Act (PAAA), and other regulations and statutes related to the procurement of goods and services where quality aspects are of paramount importance due to their potential to negatively impact the safety of people, property, and the environment.
